

TMH Quality Care Plan (QCP)

The Quality Care Plan (QCP) was established in order to guarantee affordable and adequate medical and dental services for civilian contractors working in the remote theater of Afghanistan.

At TMH Medical, our services are always available with or without a QCP. With the Quality Care Plan, TMH gives an individual the ability to be prepared with an affordable assurance-style program. The plan is offered at a low monthly rate of \$50, which can be pre-paid in 6-month or 12-month packages.

Typically, with just one office visit per 6-month period, the savings under the TMH QCP plan will be significantly greater than the initial program fee.

Sample pricing scenario:	No QCP	With QCP	QCP Savings
<i>Initial office visit with moderate/complex treatment and medication</i>	\$561.00	\$61.27	\$499.73

Below is a summary of participant benefits under TMH Quality Care Plan:

- Under the QCP initial doctor visits are NO CHARGE at a TMH Hospital or TMH Clinic
- One FREE follow-up visit for each condition that is diagnosed (this is a standard benefit for all TMH Hospital and Clinic patients)
- Preferred QCP customer rates for significant savings on additional visits and services
- A QCP discounted price schedule for medications administered by our in house pharmacy, with some medications provided at no additional charge
- Discounted rates for medical evacuations and medical escort services through TMH Medevac, should the need arise. (TMH highly recommends that every company have a Medevac plan in place prior to there being a need for medical evacuations and escorts.)

Contact TMH or visit a TMH Hospital/Clinic for more information.
